

FENNEC BLOCKCHAIN ROADMAP

Abstract:

In short, Fennec was intended to be built on the values of its underlying community. In many schools of thought, character is destiny. Signs of initiative yield immediate reactions and results. The Fennec team has no intention of setting timelines on its current set of goals, however, most goals can be subdivided into the current phase structure below:

1. Epoch 2 - Phase 1

- **Community:** General reassertion of fundamentals to the pre-existing community.
- **Development:** Reception of and adaptation to relevant community feedback.
- **Branding:** Optimization of Fennec's presentation prior to further development efforts.

2. Epoch 2 - Phase 2

- **Community:** Increased engagement efforts between Fennec and our partners, surrounding communities, as well as project/lounge administrators.
- **Liquidity Outreach and Sophistication:** Educating our community about the team's approach to achieving our roadmap goals. With this, we aim to have more users providing liquidity to increase our project's resilience and longevity. This liquidity opens doors to multi-chain accessibility.
- **Administrative Advisory:** Recruiting talent, partners, and active community members to create a set of communication and advisory boards within the Fennec project.

3. Epoch 2 - Phase 3

- **Board Sophistication:** Further development of communication and advisory boards, with the intention of creating consistently actionable plans of achieving the project's current goals.

- **Development:** Introducing FNNC dApp and DeFi gaming integration with our partners, as well as a wider pool (social network) of support for the Fennec coin.
- **Building Liquidity Diversity:** Further sophistication of Fennec's liquidity web, with the intention of driving auto-volume on our taxed EVM-chain tokenized FNNC derivative contracts.
- **Branding:** Optimization of Fennec's presentation prior to further development efforts.
- **Future Revenue Streams:** Drafting ideas of a multi-coin pool, with the intention of scaling into branding/associating Fennec with Bitcoin mining.

4. Epoch 2 - Phase 4

- **Revenue Management:** Managing, diversifying, and repurposing any auto-volume tax revenue on our taxed EVM-chain tokenized FNNC derivative contracts. This revenue could fund liquidity expansion, chain maintenance, chain security, or Fennec development.
- **Fennec Liquidity Management:** Advisory members may begin learning about managing multiple liquidity pairs to optimize Fennec's retention of inherent value.
- **Future Revenue Streams:** Establishment of a meticulous budget, action plan, and means of maintaining or expanding a multi-coin pool, with the intention of scaling into branding/associating Fennec with Bitcoin mining.

In Conclusion:

Our current epoch will likely be the most fulfilling and productive for the Fennec team. We are excited to bring about a strong and tenacious presence within our community, as well as the surrounding industry in general. Our goals are diverse, yet structured in a complimentary and paced manner. Not only does the team find our current roadmap feasible, but we also find it extremely practical, considering all of the team's surrounding opportunities.
